## Special issue on Oral Clefts and related dental and craniofacial syndromes - Multidisciplinary care in craniofacial syndromes

### About the special issue

Patients with Oral Clefts, dental and Craniofacial syndromes often require multidisciplinary care. The standards for this multidisciplinary approach are rapidly evolving.

### This special issue focuses on research in the following areas:

- Further insights in the long term effects of treatment, patient-reported outcome measures, value-based care, Oral Health related Quality of Life
- The role of 3D in craniofacial genetics and new methods in 3D evaluation, including 3D recognition of facial markers for diagnostic or etiological purposes (or 2D in long term studies)
- Use of 3D techniques and/or artificial intelligence to improve evaluation, differential diagnosis or communication with patients with congenital
  - dental malformations (e.g. oligodontia and amelogenesis imperfecta)
  - craniofacial malformations (e.g. craniosynostosis, craniofacial microsomia and oral clefts)
- Combination of precise (sub) phenotyping, epidemiology, genetic and environmental factors leading to new clinical opportunities

Long term studies are encouraged. Well-documented case series on rare malformations are welcome.

# Call for Papers

Special issue on Oral Clefts and related dental and craniofacial syndromes - Multidisciplinary care in craniofacial syndromes

## Guest editors

### Maria Costanza Meazzini

Scientific Director, Cleft Lip and Palate Regional Center, Smile House, Operation Smile, S.Paolo Hospital, Milano, Consultant for Craniofacial Anomalies, Dep.of Maxillo-Facial Surgery, S.Gerardo Hospital, Monza, Adjunct Professor in Craniofacial Anomalies, University of Milano and President, European Society for Cleft Lip and Palate and Craniofacial Anomalies

### Maria Cadenas de Llano Perula

Clinical Staff Member of the Service of Dentistry of University Hospitals Leuven, Assistant Professor of the Department of Oral Health Sciences - Orthodontics of KU Leuven University, Belgium. Coordinator of the Research Unit of Orthodontics and Councilor of the Orthodontics Research Group of IADR.

### Titiaan Dormaar

Clinical Staff Member of the Department of Oral and Maxillofacial Surgery, Consultant Surgeon for Cleft and Craniofacial Anomalies Radboud University Medical Center, Nijmegen, The Netherlands.

### Edwin Ongkosuwito

Director of the Postgraduate program and Associate professor in Orthodontics, Department of Orthodontics and Craniofacial Biology, Director of the Expertise Center for congenital dental Malformations, Consultant for Cleft and Craniofacial Anomalies Radboud University Medical Center, Nijmegen, The Netherlands and Associate Editor of Orthodontics and Craniofacial Research

## About the journal

Journal Citation Indicator (JCI):0.80  
5 Year Impact Factor:2.599  
CiteScore 2021:3.2  
SJR 2021: 0.824  
SNIP 2021: 1.373

*Orthodontics & Craniofacial Research - Genes, Growth and Development* is published to serve its readers as an international forum for the presentation and critical discussion of issues pertinent to the advancement of the specialty of orthodontics and the evidence-based knowledge of craniofacial growth and development. This forum is based on scientifically supported information, but also includes minority and conflicting opinions. The objective of the journal is to facilitate effective communication between the research community and practicing clinicians.

2021 Journal Citation Reports (Clarivate Analytics): 55/92 (Dentistry, Oral Surgery & Medicine)

## How to submit

Please refer to the [full author guidelines](#) before submission. These contain information on article types and format, along with details on how to prepare your manuscript.

**Submission deadline: June 30th, 2023**

Scan the code to  
submit your article

Please select the special issue title of "Multidisciplinary care in craniofacial syndromes" from the drop-down list when you submit manuscript.
